CIA IMAGERY ANALYSIS DIVISION

6 December 1965

25X1

ERRATUM FOR CIA/PIR-7037/65, [REDACTED]

25X1

(VLADIVOSTOK SHIPYARD 202, [REDACTED])

25X1

On page 4 annotation 19 to Figure 2 should be changed to read: possible "Z" Class SS in graving dock. Visible LOA of submarine appears to be approximately 250 feet; however bow end point is uncertain and actual LOA of submarine may be approximately 290-300 feet. The visible sail length is approximately 40 feet; leading edge of sail appears to have step similar to type III or IV sail of "Z" Class SS. Staging is visible surrounding the submarine sail approximately half-way up the side of the sail. Distance between after top edge of sail and stern of submarine is approximately 145 feet.
